DYC SERIES 6220 CLASSIC VINYL WINDOW

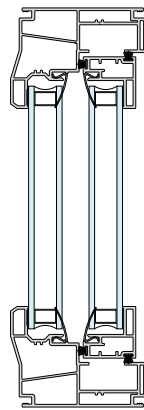

FEATURES / BENEFITS

- Exterior bevel with sloped sill design for beauty and maximum water runoff
- Fusion welded frame and sash provide a secure barrier to air and water penetration improving the strength and integrity of the window
- Our locally extruded vinyl uses the maximum amount of TiO_2 to ensure proper weathering in harsh climates
- Double wall frame for better stability
- Strong composite sweep lock that passes forced entry requirements
- Interlocking meeting rail for added security and resistance to infiltration
- Premium Eco-Ban dual weather stripping seals out dust, air, pollens, and resists molds and mildew
- DP-50 rated for structural performance
- Patented constant force coil balance system for effortless and maintenance-free operation of sash plus improved egress
- Tilt-In sash for easy cleaning from inside your home
- $\frac{3}{4}$ " overall Insulated Glass with double strength glass is standard
- High performance Duralite™ butyl spacer reduces condensation and improves U-factor
- Bettervue® improved visibility screen is standard allowing 20% more airflow and better insect protection

The DYC CLASSIC 6000 Series vinyl welded window system includes a single hung and companion single slider, 3-lite slider and picture window all featuring a uniform frame appearance, offering consistency in every elevation in your home. Architectural shapes are also available. The DYC CLASSIC 6000 Series offers a slimmer profile unlike older bulky vinyl frames. This new window system is made to order and built in custom and standard sizes and shapes for both replacement and new construction applications.
