## Quality Storm Windows Built to Last a Lifetime.

DYC storm windows offer the homeowner a viable alternative in thermally efficient window products that can save substantial heating and cooling cost. Our storm windows help reduce air, dust, and pollen infiltration and also are effective on outside sound control. They are easily installed on older and newer homes and they are custom built to each opening. The dual durometer vinyl "thermal break" reduces conduction of heat and cold. We use durable environmentally friendly powder coat finishes on our painted windows.

### 240 SERIES

#### TWO TRACK SOLID FRAME STORM WINDOW FEATURES

- Sturdy solid main frame construction
- Single hung design with half insect screen
- Sashes easily remove for cleaning
- Available in four environmentally friendly VOC free finishes
- Custom built to exact size
- Moderately priced for quicker payback

### 340 F/FS SERIES

#### THREE TRACK HOLLOW FRAME STORM WINDOW FEATURES

- Double hung design with super strong hollow tubular frame
- Ideal for use on wood windows
- Insect screening is standard on 340-F series
- Phifer solar insect screening is standard on the 340-FS series, blocking 65 % of the sun's heat and glare
- Optional Phifer solar screening offers the ultimate in shading protection by blocking up to 90% of the sun's heat while offering excellent outward visibility
- Custom built to exact size

**SPRING LOADED FORCED ENTRY  
RESISTANT SASH LOCK**

**CONTINUOUS WIND LOCK/NYLON  
CORNER TILT KEY**

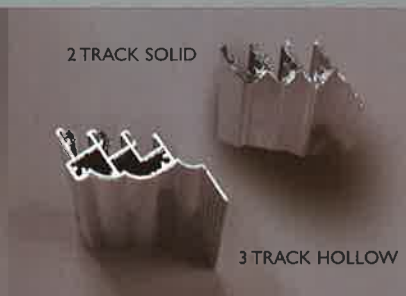

**DON YOUNG COMPANY STORM WINDOW ADVANTAGE**

**Convenient Self Storing Aluminum Storm Windows**

1. "Offset Design" built into main frame provides extra clearance from primary window and additional dead air space for more insulation and easier access for operation of sashes.
2. Self-sealing "dual durometer vinyl thermal- break" around the perimeter flange aids in reducing conduction of heat and cold.
3. Hollow extruded main frame with mitered, sealed corners is fastened with two screws on each corner for structural stability.
4. "Marine glazing" wraps around glass for a positive barrier against air and water infiltration.
5. Patented ECO-BAN antimicrobial weather stripping for additional protection against mold, mildew, and pollen infiltration. The weather strip has double mylar fins on the full perimeter of all main frame tracks and is silicone impregnated for smooth operation and includes a UV stabilizer.
6. "Spring loaded" forced entry resistant sash locks ensure a positive lock on all glass and screen inserts.
7. "Mechanical interlocking meeting rails" combined with top and bottom wind deflectors helps eliminate rattles, dust, pollen, and excessive air infiltration.
8. "Nylon corner-key tilt pins" on sash insert corners reduce friction of moving parts, and assure quiet effortless operation.
9. Hollow tubular frame provides extra strength and prevents twisting of windows.
10. Extremely low air infiltration rates.
11. DYC storm windows use environmentally friendly VOC free powder coat finishes and are also available in mill finish.
