

# Enjoy the Outdoors

With The New Aluminum Window Systems From  
Don Young Company

The beautiful new DYC thermally-broken aluminum casement window is the perfect window where maximum ventilation and daylight are a priority. Its unobstructed view makes this the perfect choice for sunrooms and egress sensitive applications. The beveled faced design is aesthetically pleasing for all types of installations. Three layers of weather-stripping make this an exceptionally high performance window for your remodeling or new construction project.

*Also Available in Awning Configurations, LC-40 Rated*

# DYC Series 8900

## Thermally-Broken Aluminum Casement Window

1. Heavy Duty .062 aluminum frame and sash ensures structural integrity, durability and low maintenance.
2. Thermal break design improves thermal performance and reduces conduction of heat and cold through frame and sash and minimizes annoying condensation.
3. Beveled exterior frame design with mitered corners reinforced with internal gussets provides aesthetically pleasing appearance with superior strength and helps moisture drain away from window.
4. Extruded aluminum interior glazing bead provides a clean appearance instead of exterior UV sensitive vinyl glazing beads.
5. Three rows of foam filled bulb weather stripping ensures superb air infiltration ratings and performance.
6. High quality hardware with folding crank handle and concealed hinges ensures smooth operation.
7. Sturdy steel multipoint locking system secures sash firmly to main frame and engages weather stripping for optimum efficiency and added security against forced entry.
8. Environmentally friendly powder coat (no VOC's) provides durable, colorfast finish in bronze, tan, white and silver.
9. 7/8 Inch overall I.G. thickness and warm edge spacer system with optional Low E and argon gas for maximum thermal performance.
10. Full interior Bettervue® screen system with easy release thumb turn latches.

## Options

- High performance Low E, pattern and tinted glass
- Internal grids in flat or contoured design
- Special egress hardware
- Nail fin for new construction or flush front flange
